PREFACE

THIS volume is the second printed book of the Old Records of Cambridge, and, as stated concisely on the title-page, contains "the records of the Town Meetings, and of the Selectmen, comprising all of the first volume of Records."

The period of time covered is from 1630 to 1703.

The general plan and scope of the "Proprietors' Records" — the first printed book of the Old Records — has been followed even to the mechanical features.

It has been the intention to present in this volume *all* and the *same* information which a perusal of the manuscript would present to the reader. No attempt has been made to modernize the text, or to make corrections of any description. From page 1 to page 354 the book is a reproduction of the original, except the introduction of the title, paging, and explanatory marks and foot-notes.

Throughout this volume the dates of the entries do not appear consecutively in all cases, but the dates are published in the exact order in which they appear in the originals. It has not been deemed advisable to place them in consecutive order, except when such order was in agreement with the original text.

The figures at the top of the pages indicate the paging of the transcript. The heavy figures enclosed in brackets represent the paging of the original book in its present condition.

The title "Town Records" has been used, in the belief that the appearance of the book would be thereby improved.

Brackets enclosing a blank space, thus, [ ], signify that something is missing from, or illegible in the original. Carets, ∧, show that a letter or letters in a word are missing. Whenever a star, *, appears on a page it refers to a foot-note on that page.

The task of preparing the index and reading the proofs has been a severe one, due to the worn condition of many of the pages of the original manuscript, and has compelled the greatest care in the translation of the text, that no unseemly errors might creep in.

The proofs have all been read by Miss Sarah S. Jacobs, and have been examined by reference to the original pages, to insure correctness.

As the copy was also prepared by Miss Jacobs, it will be seen that no small part of the work has fallen upon her.

That she was well fitted to perform the task must be evident from her successful effort in the issue of the "Proprietors' Records," published in 1896.

An attempt has been made to produce a complete index, and the forty or more pages devoted to this purpose indicate its thoroughness.

As a frontispiece to this volume, there is printed a map of Cambridge as existing in 1635. This map is, of course, lacking

in absolute accuracy, as there are extant few plans or maps which are available for use in preparing a positive reproduction. The compiler, Mr. Charles D. Elliot, now a resident of Somerville, Mass., has, however, taken advantage of the best obtainable data, and even a cursory examination will show its value in determining certain localities which otherwise might be difficult to understand. This plan, too, has the indorsement of Hon. Charles H. Saunders, ex-Mayor of Cambridge, who has given much thought and intelligent investigation to the earliest periods of local history.

It must be understood, however, that the map is in no sense an official one, and that it is published merely as an aid to a more complete understanding of many references throughout the text.

It will be noted that marginal annotations occur on several pages, and, lest it might be assumed that these were penned by the original clerks, it is deemed proper to say, that an examination of the manuscript will show that nearly all of the annotations are the handiwork of more modern scribes. This is proven by the modern method of spelling, as well as the arrangement of the annotations and marks in the manuscripts.

It might not be amiss to state that, in a large number of cases where names are appended to reports, etc., the names are probably original signatures in the manuscript, as in the case of the report of John Watson and Abraham Holman, under date of 8th of June, 1685, in the matter of an investigation into the condition of the highway leading to Concord. (See folio

276.) The antiquarian might discern something of value in this fact.

With this volume, there are published nine reproductions of pages in the original record.

These pages have been selected so as to show in each case, except one, the signature of the Town Clerk for the time being.

The single exception is in the case of William Spencer (1632–1635), whose name does not appear on the page which has been copied. It was difficult to find any page in the record of those earlier years which was sufficiently well preserved to be reproduced, the one selected being probably the most desirable.

For a verification of the dates of service of the several clerks, the compiler is indebted to Mr. William W. Dodge of this City, who gave freely of his experience and time in a close examination of the chirography to establish with some degree of positiveness the names of the recording officers. The compiler desires also to record the able assistance of Mr. William H. Whitney of this City, who has given valuable information with reference to some of the ancient boundary marks.

CAMBRIDGE, JULY 20, 1901.

I, Edward J. Brandon, clerk of the City of Cambridge, hereby certify that the following, beginning with page 1, and ending with page 354, is a true and correct copy of the Records, known as the Town Records of the Town of Cambridge (formerly Newtowne), now in the custody of the City Clerk except that the title, paging, and explanatory marks and notes have been added in the printed volume.

The Towne being called together this day, among other things it was prpoſed to them, that the farme on the South ſide of the river, form^r^ly belonging to m^r^ Andrews dec̄d, now apperteyneing to m^r^ thomas Danforth was prejudiced by lotts granted to some of ye Inhabitants of Cambridge, and about twenty acres thereof taken away thereby. The Towne conſidered of the matter, and it was acknowledged that old m^r^ Andrews had fifty acres of land granted to him sundry years since, by way of addition to the old farme that he had bought of one m^r^ Girling. and to find out the right it was conceiued that the beſt expedient is to vſe the beſt means that may bee, to get the knowledge of ye old line of the farme before the adition was made, & y^t^ being done, then to procure a ſufficient surveyo^r^ to lay out the fifty acres adjoyneing to it, and

for the effecting whereof the Select men have choſen Deacon Stone, L.t Winship, Edw. Oakes, & ffrancis Moore Junr a comittee to informe themselves the beſt they can about the old line of the farme and to prcure an able surveyor to lay out the fifty acres vpon the head of it touching upon Boston line, and then to make report to the Townſmen what they haue done in the premiſes, and what damage the said farme doth ſuſteine by any grant of the Towne to particular perſons.

mr John flint is nominated to be the Surveyor.

A Return of the Comittee Chosen as on the other Lefte hand page choſen to Lay out an high way for the Country to Concord, from the five mile Swamp and onwards to Concord and from Leut: ffisks to Woburn, as was Ordered At the meeting on the 8th of March 169$\frac{6}{7}$ being the day of Choiſe of Town Officers

Upon the 17th day we mett, and began att the five mile Swamp and marked trees att a convenient diſtance, till we came unto Samuel Wittamores fence; and then gave diſtants Southwest of the fence, till we came againſt his dore, then we marked a young Elme Northeaſt of the high way; and So marked on both ſides of the way, till we came to Samuel Winſhips; then the widdow Winſhip did Informe us, that her huſband had agreed with a former Co̅mittee, that againſt his fence Southweſt, that the high way Should be Six Rodd wide and we accepted of it, and when we were paſt the fence, we marked trees on both ſides the high way again att a convenient diſtance till we came to M^r^ Æſtabrookes his fence, allowing that to be one ſide of the high way, and Marked trees on the other ſide, till we came into the Lane between M^r^

Eaſtabrookes and John Poulter, and then aggreed that that ſhould be three Rodds wide, each of the propriators allowing their due diſtance the Land being good, we thought might be convenient: the like we did agree with Goodman Muzzey untill we was paſt his present fence, and aggreed with him for the ſeting up of his fence upon the one ſide of the Road, and mark$_{\wedge}$ the Other to the meeting houſe then we renewed the Marks to Concord. Then beginning att Leiut: Hicks, we renewed the Marks toward Woburn, that had been twice marked before, by ſome of the preſent Comittee, till coming to John Tidds field, we found the highway encumbered, with with fence and broken up Land, and when we were paſt that, we renewed the marks of the high way to Woburn Line.

The return of ye s^d^ Committee.

We whose names are under written being appointed a Committee by ye Select Men of Cambridge as appears by an order bearing date ye 11th of December 1699: to Consider of a Convenient high way for sundry of o^r^ Neighbo^rs^ living Northward of o^r^ Parrish to come to ye publick Meeting and to Market: Accordingly we did attend it ye 18th day of this Instant, and do Judge it most Convenient to be where it now is allowed and fenced from John Lawrence his house to ye Brook Southerly & so continuing along by Goodman Nuttings ffence that now is till it come to Mr Goffes Lott, & then upon ye Edge of Mr Goffes Lott till we come to Goodman Kerlys land, & so through his land where it has formerly been laid out, Continuing till it come at a Swamp upon Mr Aaron Bordmans land (as we were Inform'd, wch we think will be inconvenient by reason of ye chargeableness it will attend to make it passable, and the small inconveniency that will be to the Proprieto^r^:

to compaſs ye weſt end of the Swamp till we come to Joseph Teeds land, & so continuing where ye way is now trodden till we come unto ye Countrey Road y^t^ leads from Concord to Oburn between Joseph Teeds and John Johnsons: and further we think it may be convenient that ye way go up by the Widow Teeds & so continuing till it come at ye Meeting houſe where it is now trodden

Samuel Stone
